

The Model 9000 water purifier/distiller effectively removes substances such as arsenic, aluminum, bacteria, chloride, chlorine, chloroform, copper, fluoride, lead, mercury, nitrates, sodium, sulfate, trihalomethane (THM) and viruses.

1. Ordinary tap water is heated to 212° F (100° C) killing microbes such as bacteria, cysts and viruses that may be present.
2. Steam rises leaving behind dead microbes, dissolved solids, salts, heavy metals and other substances.
3. Low boiling light gases are discharged through the gaseous vent.
4. Steam is condensed in the stainless steel coil.
5. Purified water then percolates through the organic coconut shell carbon filter, enhancing quality by adsorption of volatile organic compounds.
6. The 100% steam distilled water is collected in the 1 gallon polycarbonate collector/dispenser bottle (included).

WISE FEATURES

- Steam Distillation
- Contemporary Design
- No Assembly or Installation
- Auto Shutoff After 1 Gallon Cycle
- Up to 5 Gallons Per Day
- Stainless Steel Condenser
- Vent System
- Carbon Post Filtration
- Lightweight & Portable
- Removable Boiler
- Polycarbonate Carafe
- WQA Tested & Certified

PURE BENEFITS

- Purity Guaranteed** 100% steam distilled
- Pure Style** complements your decor
- Pure Convenience** no water hookups
- Pure Safety** will not boil dry
- Purely Fresh** for drinking & cooking
- Pure Peace of Mind** non-leaching
- Pure Function** reduces volatile organics
- Purity Maximized** by organic carbon
- Pure Simplicity** for storage & travel
- Pure Service** for easy filling & cleaning
- Pure Quality** collector/dispenser
- Pure Integrity** quality ensured

An organic carbon filter inserts into the top of the 1 gallon collector/dispenser bottle.

MODEL 9000 SPECIFICATIONS

- Distillate Capacity 1 Gallon (3.8 Liters) in 4.5 Hours • 5 Gallons (19 Liters) in 24 Hours
- Dimensions 15" (38 cm) Height 16" (41 cm) Depth 9.5" (24 cm) Width
- Net Weight 10 lbs (4.5 kgs)
- Rating 120VAC/60Hz 750W • International 230VAC/50Hz 750W
- 1 Year Limited Warranty • USA & Foreign Patents • EPA Est. NO. 067426-WI-1
- UL Listed • CSA Certified • CE Certified

Operational maintenance and replacement requirements are essential for product to perform as advertised.

The collector/dispenser bottle and the boiler tuck neatly into the body of the distiller.

The seamless, removable boiler has a concealed heating element that cannot become coated with scale and mineral deposits.
