

Set Up Wi-Fi for Your Freeze Dryer

STEP 1 GET STARTED

Download the Harvest Right App from Google Play or the App Store. Ensure your freeze dryer is compatible with Version 6.

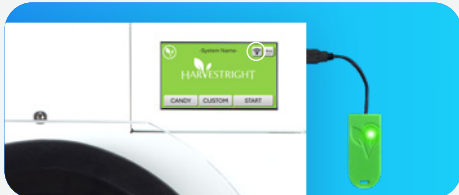

Insert the Wi-Fi adapter, power on the freeze dryer, and wait for the home screen to appear.

Check the Wi-Fi adapter light—if it alternates between green and blue, the connection is good.

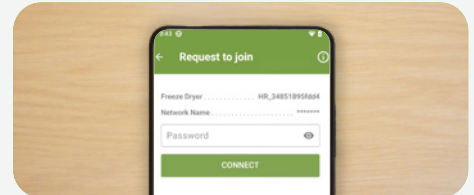

STEP 2 CONNECT TO WI-FI

Tap the Wi-Fi button in the top right corner of your freeze dryer screen.

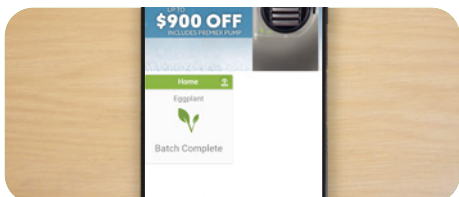

Scan the QR code on the Wi-Fi monitoring screen with your phone's camera.

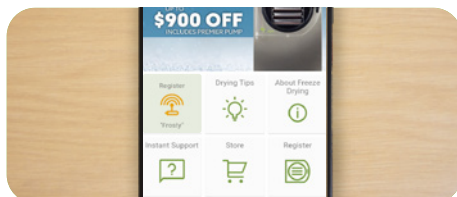

Select your Wi-Fi network, enter your password, and tap 'Connect'.

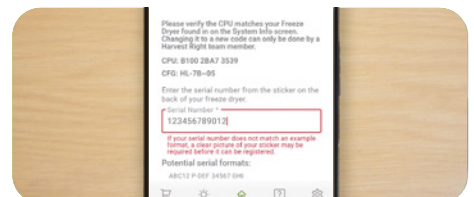

STEP 3 COMPLETE SETUP

Once connected, open the app—your freeze dryer should now appear.

If prompted, register your machine by tapping the orange button.

Enter the serial number, purchase date, and where you purchased your machine from—and you're all set!
