**Model Cube300S**  
**Compact Juicer**

The Omega Juice Cube. A powerful, low speed, masticating juicer and nutrition system with a square footprint and cube form factor. Excellent counter top appeal and a compelling industrial design.

With the versatility to create nut butters and baby food, work as a pasta and soy milk extruder, or even serve as a grinder for coffee beans and herbs, this Omega Juice Cube does so much more than extract fresh juice from fruits, vegetables and leafy greens!

The Juice Cube features a dual stage masticating extraction for optimum yield. It automatically ejects pulp into a separate container for easy, continuous juicing. This Juice Cube operates at a low speed of 80 RPMs, allowing this juicer to chew through plant fibers and penetrate membranes to extract the fullest taste and highest values of vitamins and minerals from foods such as wheatgrass, carrots, and more. Plus, it ensures less foaming and minimal heat rise for healthier, longer lasting juice.
