The Excalibur® Model 4548CDB, 48-hour Digital Controller Dehydrator, comes with 5 Trays and a clear door so you can view progress without interrupting the drying process. The 48 Hour, 2 Time / 2 Temperature Digital Controller lets you set the dehydrator and forget it. To speed up the drying process, set the dehydrator at a higher temperature for a specified period of time; and then set the dehydrator at a lower temperature for a specified period of time. The unit will automatically adjust after the 1st setting and turns off when the 2nd setting is complete. The Model 4548CDB comes complete with 8 square feet of drying space, 5" fan, adjustable thermostat 95°F – 165°F, Hyperwave™ Patented Technology, and Parallelex Horizontal Air Flow.

The Excalibur Dehydrator removes water from food by a continuous circulation of thermostatically-controlled warm air. A variety of foods, from bright golden kernels of farm-fresh corn to rings of island-sweetened pineapple can be dehydrated. Slices of beef, chicken, fish or even venison can be easily dried into homemade jerky. A fruit puree dries into a vividly colored, taffy-like snack or fruit roll. Make soup mixes, herb and spice mixes, yogurt, arts & crafts ... even all-natural pet treats. Operating cost for your Excalibur® Dehydrator is approximately 3 - 6 cents per hour. Using your dehydrator compared to traditional canning or freezing methods will prove to be well worth your initial low-cost investment.
